

The Future of Workforce Shift Management Report

This report demonstrates how AI Shift transforms traditional scheduling into an intuitive, efficient process using generative AI technology.

* Traditional vs. AI-Powered Scheduling

Traditional

VS

AI-Powered

AI-powered scheduling revolutionizes traditional manual processes, allowing managers to input requirements in natural language.

* Cost-effective Pricing 1€ per person

* Pricing Benefits

- Unlimited AI-powered scheduling
- Multi-language support
- Regular feature updates
- Secure cloud storage

* Real Examples of Shift Rules to AI

- Ensure we always have a manager on duty in each shift
- For employees with young children, please limit their night shifts to twice per week
- Always schedule experienced staff members alongside our newer employees
- Due to their working preferences, please keep John and Sarah on different shifts

* Success Stories
